

TechAccountingPro

About Us

Introduction

At TechAccountingPro, our mission is to provide solutions that empower and change the accounting space. We deliver thoughtful, data-driven insights and drive innovation that helps our clients solve accounting and reporting challenges.

Our Values

Challenge of Status Quo

At TechAccountingPro, we challenge the status quo by identifying and highlighting risks and issues that others may overlook. Our proactive approach ensures that our clients are always ahead. Our commitment is to provide governance members with fresh perspectives and valuable insights, ensuring you're aware of potential risks before they become problematic.

Trusted Advisors

We serve as your trusted advisors, offering more than just compliance assurance. Our focus is on delivering strategic insights that others miss, helping you navigate the regulatory complexities with confidence. We deliver crucial, fresh insights and identify overlooked issues, equipping governance members and business leaders with the information needed to make informed decisions.

Innovation

We lead with innovation and diversity, bringing a wide array of perspectives and cutting-edge automation technologies to every project. This approach not only streamlines processes but also introduces efficiencies that traditional methods cannot match. We embrace diversity within our team to bring a broad range of insights and solutions to every challenge.

Our Expertise

- TechAccountingPro offers technical accounting expertise, tailored to meet your distinct business requirements.
- We work with startups in the digital assets space: DAO, token issuers, foundations, proof-of-stake validators, and other Web3-native businesses as well as with other accounting firms serving the space.
- We will answer all your questions about US GAAP compliance and provide you with timely, accurate responses, letting you concentrate on running your business without the stress. With our expertise, you can focus on growing your business while we handle the technicalities.

Our Founder

- Andrei Belonogov is a licensed CPA, fellow chartered accountant of ACCA. In 2016, Andrew was awarded a doctorate in accounting and statistics. He published two books, one of which was nominated as the Best Academic Book 2017 in Russia. Andrew also authors a blog about technical accounting in the digital assets industry.
- Dr. Belonogov is the accounting guidance ambiguity expert with over twelve years of providing services to the public. Andrew started his career at Big-4 (KPMG), where he pioneered the implementation of the new revenue accounting standard in the US. He drafted technical accounting whitepapers for S&P 500 clients and worked closely with the quality control and the national office and Department of Professional Practice to address critical issues.

Our Services

How we help our clients

Technical Accounting

Implementation of new accounting standards (ASC 350-60, 'Cryptoassets', ASC 606, 'Revenue from contracts with customers', ASC 842, 'Leases', etc.).

Preparation of draft responses to SEC comment letters.

Advice and technical accounting memorandums on the accounting treatment of transactions involving digital assets, for example:

- Principal market analysis
- Public Coin Offerings
- SAFTs and token warrants
- Market making
- Mining, staking, and MEV revenue
- Token grants
- Consolidation and Purchase accounting

Financial Reporting

- Drafting 10-Q and 10-K filings
- Financial statements preparation
- Cash-to-accrual basis conversion
- Crypto & fiat accounting services
- Custom reporting solutions (e.g., the "bridge" reporting for key operating metrics; reports of cash and stablecoin flows)

Third-party Solutions

System implementation:

- Liquify
- BitWave
- Crypto
- Cryptoworth
- Integral
- Workiva

Service provider selection:

- Pricing data vendors
- Financial statement auditors
- Crypto accounting subledgers
- Token grant management
- Lease accounting software

Audit Readiness

Risk Assessment. Review business operations and accounting processes to identify potential issues commonly identified during audits of financial statements.

Recommendations. Identification of gaps in accounting policies compared to relevant authoritative requirements and evaluation of the design and operations of finance processes in place against best practices followed by peers.

Accounting Cleanup. Reconciliation and restoration of records for historical business activities spanning multiple years. Preparation of the investor-ready startup financial information.

Audit Management. Acting as a liaison with the external auditor through the audit report date.

Other Services

Fractional CFO

Intelligent process automation

Board governance & representation

ICFR & Accounting Trainings

Thank You

Thank you for considering TechAccountingPro as your partner for progress. Together, we can turn challenges into opportunities and dreams into realities, for a brighter and more promising future.
